Summary

A dedicated computer scientist and MERN Stack Maestro, coding faster than a speeding bullet and debugging more powerfully than a locomotive. Passionate about serving humanity through problem-solving and building robust, scalable web applications from database to user interface. A quick-learning Swiss army knife of web development, always eager to adapt and tackle new technological challenges.

Professional Experience

SandyApps, *MERN Stack Developer* 🔗   10/2023 – present

Developed robust web applications using MERN stack (MongoDB, Express, React, Node.js) at SandyApps. Implemented real-time features and RESTful APIs, enhancing user experience and system efficiency. Leveraged JavaScript expertise to create dynamic interfaces and optimize performance. Streamlined workflows, resulting in significant time savings. Passionate about innovative solutions using modern web technologies.

Marham.PK, *MERN Internee* 🔗   08/2023 – 10/2023

Contributed to healthcare tech solutions at Marham.PK through MERN stack internship. Developed responsive web applications, implemented RESTful APIs, and enhanced user interfaces using MongoDB, Express, React, and Node.js.

Education

Bachelors in Software Engineering,   10/2019 – 07/2023
Punjab University College of Information Technology (PUCIT)

Skills

| HTML5 | CSS | ReactJS | MERN | Git/GitHub | Java | JavaScript | Problem Solving |

Projects

Attendance WebApp

From Click to Clock, built a cutting-edge MERN stack attendance app using picture-capturing functionality to eliminate manual marking and boost accuracy. My application leverages libraries like MUI and Tailwind CSS for a beautiful and intuitive interface, managed efficiently through Git/GitHub.

DevLearn - An eLearning Platform (FYP) 🔗

The only thing that sets our project apart from Udemy, Coursera, and others is our Unique UI/UX with additional functionality. It is being developed in MERN Stack, making it more flexible, dynamic, and responsive. I am working as a Co-Leader in the team and a front-end React.js Developer.
